MOSQUITO CONTROL PROGRAM – KANATA NORTH Weekly report –May 12th to May 18th, 2024

MONITORING and WEATHER

Accumulation of water: total of 14 mm Date of precipitation: Mainly on May 12^{th} and May 14^{th} Is there presence of larvae on the field?: Yes \boxtimes No \square Note: Larvae development continue in some sites.

TREATMENT

Was there a treatment?: Yes \boxtimes No \square

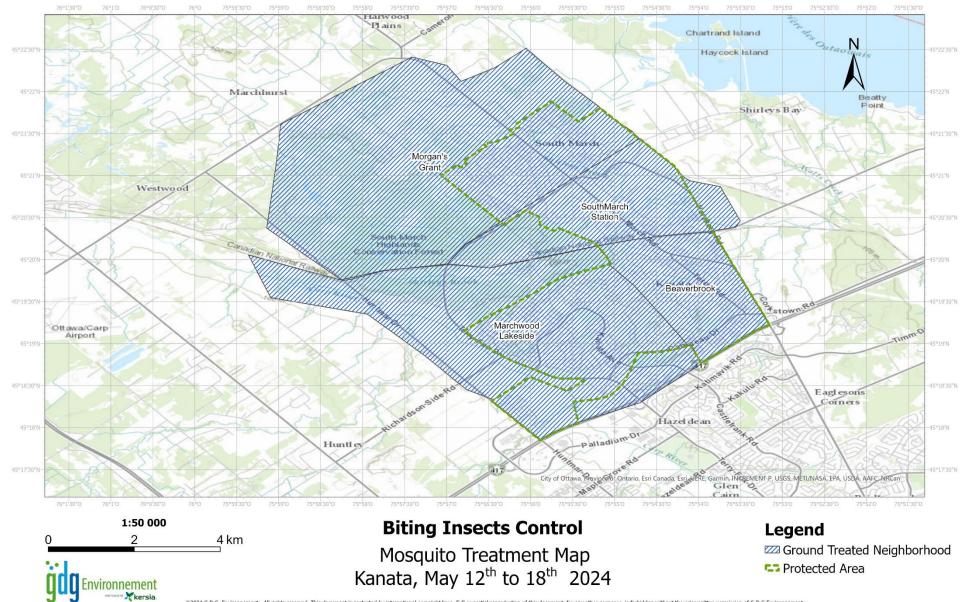

Type of treatment: Ground \boxtimes Aerial \square

Date of treatment: The second treatment has been completed on April 17th. Treatment has been done in all sectors of Kanata North as indicated on the map below.

Since mosquitoes can fly up to 2 km, (even more in some circumstances), it is important to mention that treatments done in one area reduce nuisances for all the protected aera in Kanata North, not only the area treated.

SWEEP TEST

Were there sweep tests this week? : Yes \Box No \boxtimes Note: Sweep tests will begin during the week of May 20th.

TRAPPING

Was there trapping this week? : Yes \Box No \boxtimes Note: Trapping will begin during the week of May 20th.

CITIZEN REQUESTS

Were there any key requests from citizen or from city this week? Yes \boxtimes No \square

On May 13th, a citizen contacted us to indicate the presence of stagnant water in a park near his home. He wanted to ensure that the treatments were well done there. The treatments have been already done there and the areas will be monitored throughout the season.

Forecast for next week (May 12th to May 18th):

Thunderstorms are forecast during the week. New hatchings are possible depending on the precipitation received. Treatment may be possible.

Possible treatment: Yes \boxtimes No \square

If yes:

Type of treatment: Ground \boxtimes Aerial \boxtimes

Date of planned: Type of treatment depend on quantities of precipitations.
